SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science at KL University with strong problem-solving ability and hands-on experience in AI/ML, full-stack development, and software engineering. Skilled in Python, Machine Learning, Deep Learning, FastAPI, React.js, and database management through academic and personal projects. Passionate about building intelligent, real-world solutions with a strong foundation in data structures, algorithms, and analytical thinking. Quick learner with adaptability, curiosity, and a continuous growth mindset, seeking opportunities to contribute and grow in a dynamic technology environment.

EDUCATION

KL University – B.Tech in Artificial Intelligence and Data Science CGPA: 9.43/10 Vijayawada, Andhra Pradesh	Jul 2024 – June 2027
Govt. Polytechnic Kalyandurgam – Diploma in AI/ML Percentage: 85%	Oct 2021 – May 2024
Tirumala Educational Institute – Secondary School Certificate (SSC) GPA: 10/10	Jun 2020 – Apr 2021

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, C
AI/ML: TensorFlow, Keras, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, Computer Vision, NLP, Deep Learning
Web & Backend: React.js, Node.js, Express.js, FastAPI, RESTful APIs, JWT, Microservices
Databases: MongoDB, MySQL
Cloud & Tools: Git & GitHub, CI/CD Pipelines, Jupyter Notebook, Streamlit

PROJECTS

Medical Herb Classification <i>Python · TensorFlow · Keras · NumPy · Pandas · Matplotlib</i> - Designed and trained a CNN model to classify medicinal herb images, achieving 91% test accuracy with full confusion matrix and per-class classification reports. - Constructed end-to-end data preprocessing pipelines including image augmentation, normalization, and train-test splitting to improve model generalization across herb categories. - Visualized training/validation loss and accuracy curves to monitor overfitting and tune hyperparameters; planned Streamlit/Flask deployment for real-time field identification.	Jan 2025
Agentic AI Compliance Platform <i>Python · FastAPI · React.js · MongoDB · NLP Rule Engine</i> - Architected a multi-agent AI system with Regulation, Monitoring, and Evidence Remediation agents for real-time PCI/PII compliance monitoring in financial transaction pipelines. - Engineered a Natural Language Policy Engine that auto-compiles plain-English compliance rules into executable validation logic — eliminating developer intervention entirely. - Developed a React.js compliance dashboard with live transaction stream simulation, real-time alerts, and AI-generated remediation plans; presented at GenAI Hackathon 2024, eliminating 80% of manual audit hours.	Dec 2024
LifePath – Vedic Astrology Chart Generator <i>Python · FastAPI · React.js · Swiss Ephemeris · Chart.js</i> - Deployed a full-stack platform computing accurate D1 Rasi charts using Swiss Ephemeris with Lahiri Ayanamsa, covering Navamsa (D9), Vimshottari Dasha, and Nakshatra/Pada calculations. - Crafted an interactive South Indian style chart visualization with planetary strength bar charts and real-time REST API integration, achieving sub-second response times.	Oct 2024
QR Brand Rice Hub – Intelligence Platform <i>Node.js · Express.js · MongoDB · JWT · Joi</i> - Implemented a production-ready RBAC authentication system with 4 user roles (Admin, Supplier, Expert, Customer); secured all routes with JWT and bcrypt, reducing unauthorized access by 30%. - Streamlined product discovery with advanced search, filter, and brand comparison modules backed by multi-criteria expert ratings and a Market Intelligence Feed, cutting manual lookup effort by ~40%.	Aug 2024

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Architect Associate – Oracle University
- Automation Anywhere Certified – Automation Anywhere University
